EDUCATION

University School of Automation and Robotics (USAR), GGSIPU

B.Tech in Artificial Intelligence and Data Science — 2024-2028

CGPA | **8.86**

Delhi Public School, RK Puram

9th - 12th — 2020-2024

12th Percentage | **92%**

ACHIEVEMENT

1st Position
PitchMela (1M1B), ELYSIAN - 2026

Top 50 Finalist
Delhi AI Grind

SKILLS

Programming & Query
Pyhton - SQL - R - HTML - CSS - C

Data Analysis & Visialization
Pandas - NumPy - Matplotlib - Seaborn - Scikit-Learn - YOLO

Reporting Tools
Jupyter Notebook - VS Code - GitHub - MySQL - Anaconda

Healthcare-relevant Skills
Data Cleaning - Pattern Recognition - Data Preprocessing - Statistical Analysis - Classification Models - Exploratory Data Analysis (EDA)

Soft Skills
Analytical Thinking - Problem Solving - Team Collaboration - Adaptability - Leadership - Communication

SUMMARY

Self driven learner who turns ideas into working projects. Curious and persistent in solving problems through AI based projects and hackathons. Focused on building strong foundations in data science and analytical thinking.

EXPERIENCE

National Informatics Center Services Inc. (NICSI) — 06/2026 - 08/2026

Machine Learning Intern

- Contributed to development of an AI-powered Vehicle Inspection and Fraud Detection System, processing and annotating 1000+ vehicles images to support damages detection, number plate recognition, and verification of 30+ vehicle attributes for model training and validation.
- Streamlined inspection of workflows using YOLO-based computer vision models, reducing manual assessment efforts and improving data pipeline efficiency.
- Performed data cleaning, annotation and exploratory analysis on large datasets to identify patterns and support model accuracy improvements.

LEADERSHIP EXPERIENCE

Class Representative (CR) - University School of Automation and Robotics, GGSIPU — 08/2025 - Present

Class Representative

- Coordinated between students and faculties, managed communication for a cohort of 70+ students, and represented batch interest in departmental discussions

Hosted in ANUGOONJ (Biggest Cultural Fest of GGSIPU) — 04/Feb/2026-06/Feb/2026

Anchor

- Hosted stage events at GGSIPU's flagship annual cultural festival with over 20,000 attendees, demonstrating strong public speaking, audience engagement, and event coordination skills.

PROJECTS

MindLink - AI Powered Mental Wellness Assistant

Winner, 1M1B Hackathon

- Developed an AI-driven mood tracking system using sentiment analysis on user-input text data to identify mental health trends and patterns.
- Generated personalized reflection prompts using intelligent response algorithms designed data-driven features oto promote mental well-being insights.
- Analyzed and visualized mood data over time to surface actionable trends - directly aligned with healthcare data reporting.

SURAKSHA+ Emergency Civic Issue Reporting Platform

Top 50 Finalist, Delhi AI Grind

- Built an emergency response platform with real-time alerts and structured complaint tracking system, generating dashboards for civic transparency and accountability.
- Implemented data collection pipelines from multiple sources and structured reporting for internal stake holders.

Traffic Control Solution

Smart India Hackathon

- Built AI-powered dynamic scheduling for train route optimization using forecasting models to predict delays and passenger demand.
- Improved operational efficiency through intelligent timetable adjustments-applied statistical analysis to large-scale scheduling datasets.
